**Hand-held Spirometer**

MicroLoop features a high definition color touch screen that can display your choice of a Volume/Time Curves, complete Flow/Volume Loop or child incentives. It measures up to 41 spirometry parameters, offers on-screen test quality prompts, meets the new ATS/ERS standards, has a choice of predicted values and languages, and stores data for over 2,000 patients. Software is included and provides expanded data storage and trend analysis. The MicroLoop is battery operated and shipped complete with a carrying case and all necessary disposables.

**Aesthetic Hair Removal System**

Clinically proven safe and effective, Duet removes unwanted hair from nearly all body sites and is suitable for all skin types and colors, including dark skin. Duet's skin rejuvenation applications include treatment for pigmented and vascular lesions as well as fine lines and wrinkles. Clinically proven to stimulate collagen renewal, Duet improves overall skin texture and produces noticeable results as early as the second visit. The Duet is being used on bare skin without the need for numbing creams or cooling gels

**CLIA-Waived Microcoagulation System**

The ProTime Microcoagulation System for prothrombin time testing is designed to safely monitor warfarin therapy for use by healthcare professionals and for patient self-testing. Software updates include the ability to auto-send results to a printer, computer, or be transmitted to a LIS or EMR database through a clinical interface. Off-meter sampling provides safety against sample contamination and disease transmission. ProTime offers both onboard and optional external quality controls.

**CLIA-Waived Point of Care Analyzer**

The Afinion point-of-care system is a simple, fast and reliable way to perform testing in the physicians' office, clinic or hospital point-of-care setting. The system and the first test for HbA1c are FDA 510(k) cleared and National Glycohemoglobin Standardization Program (NGSP) Certified, as well as CLIA waived. The HbA1c test is performed using simple pin-prick blood sampling and provides results in only three minutes.

**Obstetrical & Vascular Dopplers**

Increased probe sensitivity with comfortable easy-to-hold probes, all hand-held Dopplers include one probe of your choice: Obstetrical: 2MHz, 2MHz Waterproof, 3MHz, and EchoHeart Transvaginal. Vascular: 4MHz, 5MHz, and 8MHz. All probes are interchangeable with all hand-held and table-top Dopplers. Superior sound quality and probe sensitivity eases the exam. User replaceable probe cables. Significant increase in battery life in all of our Doppler systems. Three AA batteries as opposed to traditional 9 volt Doppler batteries.
