CLIA Waived Conjunctivitis Test

The FDA cleared and CLIA waived RPS Adeno Detector™ is the first true point of care test available for conjunctivitis. It provides a definitive result in 10 minutes and essentially makes available an accurate laboratory confirmation of adenoviral conjunctivitis at the time of the patient exam. The RPS Adeno Detector™ can aid health care providers to make an accurate diagnosis, foster patient acceptance of more supportive therapies, identify contagious viral conjunctivitis, and limit spread of disease while simultaneously reducing ocular antibiotic resistance and the cost of unnecessary antibiotics.

Pentra 400 Benchtop Clinical Chemistry System

Horiba ABX Diagnostics has announced availability of their new Pentra 400 Benchtop Clinical Chemistry System. This innovative design re-introduces the benchtop, small footprint concept targeted for low-to-moderate volume laboratories and as a backup alternative for high-volume esoteric testing. The Pentra 400 delivers simplified QC and patient data management with touch screen capability and incorporates optical holographic grating technology that yields the highest quality of measurement – delivering your BMP panel in less than 7.5 minutes.
