Micros im² 3 Part DIFF Analyzer

This 3-part DIFF analyzer is bundled with an "interconnected middleware" contained within a "zero-footprint" platform. Simple and flexible, it requires 10µL sampling on a closed-tube configuration reporting out to 16 parameters at 60 samples per hour. A comprehensive middleware system offers patient data management along with accession logs and cumulative reporting; customized window-panes designed to preview the relevant data at a glance in color-coded formats; and a simple and concise ability to order CBC's and QC. EMR and LIS ready!

In-Office, Painless Hemorrhoid Treatment System

Ulroid® is the painless hemorrhoid treatment that is reimbursable. FDA-approved. Done in-office, after 6-12 minute minimally invasive procedure, the patient is able to resume normal daily activities. Micro-electric charge applied to hemorrhoid base results in a natural chemical reaction that dissolves the hemorrhoid contents for natural reabsorption. No prep. No anesthesia. No patient down-time. No heat, cutting, lasers, rubber bands or staples. Covered by Medicare and most major insurers.

CLIA-Waived Hemoglobin Testing System

The Hgb Pro Professional Hemoglobin Testing System consists of a compact battery-operated meter and single-use test strips, used in measuring total hemoglobin from capillary or venous whole blood. Simply insert a test strip into the meter, place a small drop of blood on the test strip and results are displayed in less than 30 seconds.

Dry Hematology System

The QBC STAR is the world's only dry hematology system. All reagents to perform a CBC are contained in one easy-to-use safety tube--that's simple. The QBC STAR eliminates operational steps, bulky reagents, hazardous liquid waste, expensive calibration, and daily controls--that's the best. QBC STAR eliminates what made in-office CBC testing so complicated, bringing you one-step, one-button operation.

ECG With EMR Connectivity

For physicians looking for a traditional ECG who also want advanced communications with electronic storage features, the Atria 3100 combines the best of both worlds. It maintains the popular compact, easy-to-use features of the Atria 3000 and includes enhanced cutting-edge communications capabilities. Simple to use, compact. High-quality 12-channel ECG tracings. Robust communications including wired Ethernet and 802.11g. Ideal for EMR connectivity.
